

This binder has pictures of the proposed shellfish lease at or close to noon every day from August 1 through October 31 with the exception of three days which I was unable to take the pictures. There are multiple pictures taken on each day to show the proposed lease as well as the rest of the cove, these pictures are time and date stamped. At no time during taking the picture was there a boater in the proposed lease, at no time was there a kayaker or fisherman in the proposed lease although there was often boating and fishing occurring at other parts of the pond at that time. There were two instances where a paddle boarder was in or near the proposed lease at the time the pictures were taken. If there was a boat in the cove, I would take a picture of it to capture the adjacency of the boat to the farm. Several times there was a clam digger south east of the farm (outside the farm) against the shore and on few occasions, there was a boat leaving or going back to the mooring area.

Perry Raso
